# 01 ABOUT US

## Cat Moc Healthcare Design - CHD

A specialized healthcare design brand under Cat Moc Group (CMG), established in 2004. CHD has received numerous awards for hospital design and holds a National Record as the **COMPANY WITH THE MOST HOSPITAL DESIGNS IN VIETNAM.**

To date, CHD has designed nearly **100** hospitals and clinics nationwide. In addition, CHD has developed mobile clinics in **Australia** and international hospitals in **Cambodia.**

CHD is currently certified with a Level **I** construction design competency license.

Buon Ma Thuot Medical University Hospital - Achieved The 2023 Asia Architecture Award

02

## FOUNDER

**Mr. Pham Thanh Truyen, Master of Architecture, graduated as ALEDICTORIAN FROM HO CHI MINH CITY UNIVERSITY OF ARCHITECTURE with his project on the "National University Hospital". This project earned him Second Prize in the National Loa Thành Award.**

As a student, he won an Outstanding Award for his scientific research on the topic "Sterile Space in Operating Room Architecture."

He nurtured a deep passion for hospital architecture from his time in university. Immediately after graduating, due to his outstanding achievements, he was invited to join the faculty of Architecture at University of Architecture Ho Chi Minh City. During this period, he also participated in and won multiple awards in hospital design.

In 2004, he founded **Cat Moc Healthcare Design**, with the dedication to building a strong, reputable "Made in Vietnam" brand specializing in Consulting - Designing - Constructing hospitals and healthcare facilities.

With a strong aspiration to incorporate Vietnamese culture into healthcare facilities in Vietnam, he strives to create optimal and culturally relevant healing environments for Vietnamese patients. At the same time, he aims to stay aligned with modern global medical trends to better serve the Vietnamese community.

Driven by a deep passion for hospital architecture, he frequently pursues advanced training in countries renowned for healthcare design, such as Japan, the United States, and South Korea, to gain valuable experience and enhance his professional expertise.

In 2014, he and his colleagues were honored with the National Record for being the **"COMPANY WITH THE MOST HOSPITAL DESIGNS IN VIETNAM"** awarded by the Asia Records Organization in collaboration with Vietkings and the Vietnam Records Association.

In 2016, he and his team were awarded the Silver Prize at the National Architecture Awards for their project **"Children's Hospital in Can Tho"**. This work also earned him a spot on the list of **"100 - Architects of the Year 2017"** at the event held in Seoul, South Korea.

In 2023, he and his team were proudly awarded the **"2023 Asia Architect Design Award"** for the project **"Buon Ma Thuot Medical University Hospital"**. In 2024, he and his colleagues won the First Prize at the BCI Interior Design Awards 2024 for their project **"Luxury House."**

Currently, he is the Lead Architect and Head of the Architecture Department at CHD, as well as the Director of the DORIC Architecture Training Center and the CEO of CAT MOC Group.

## NOTABLE HOSPITAL PROJECTS

*HAVE DESIGNED*

# TAM TRI NHA TRANG GENERAL HOSPITAL

Investor: Tam Tri Nha Trang General Hospital

Limited Liability Company

Location: Nha Trang - Khanh Hoa

Scale: 200 beds

Total floor area: 10.000 m<sup>2</sup>

Designed: 2024

The High-Quality Treatment Building is part of the Tam Tri Hospital, which already has two operational buildings. The 8-story project is designed to ensure smooth workflow and connectivity with the existing buildings, providing optimal service for patients seeking consultation and treatment.

The design of the building ensures aesthetic appeal and modern architecture while maintaining harmony with the entire area. It incorporates the latest, high-tech medical equipment, with well-ventilated internal circulation to support healthcare activities. The layout of the pathways is carefully planned to ensure ease of movement for patients.

# CAN THO GENERAL HOSPITAL

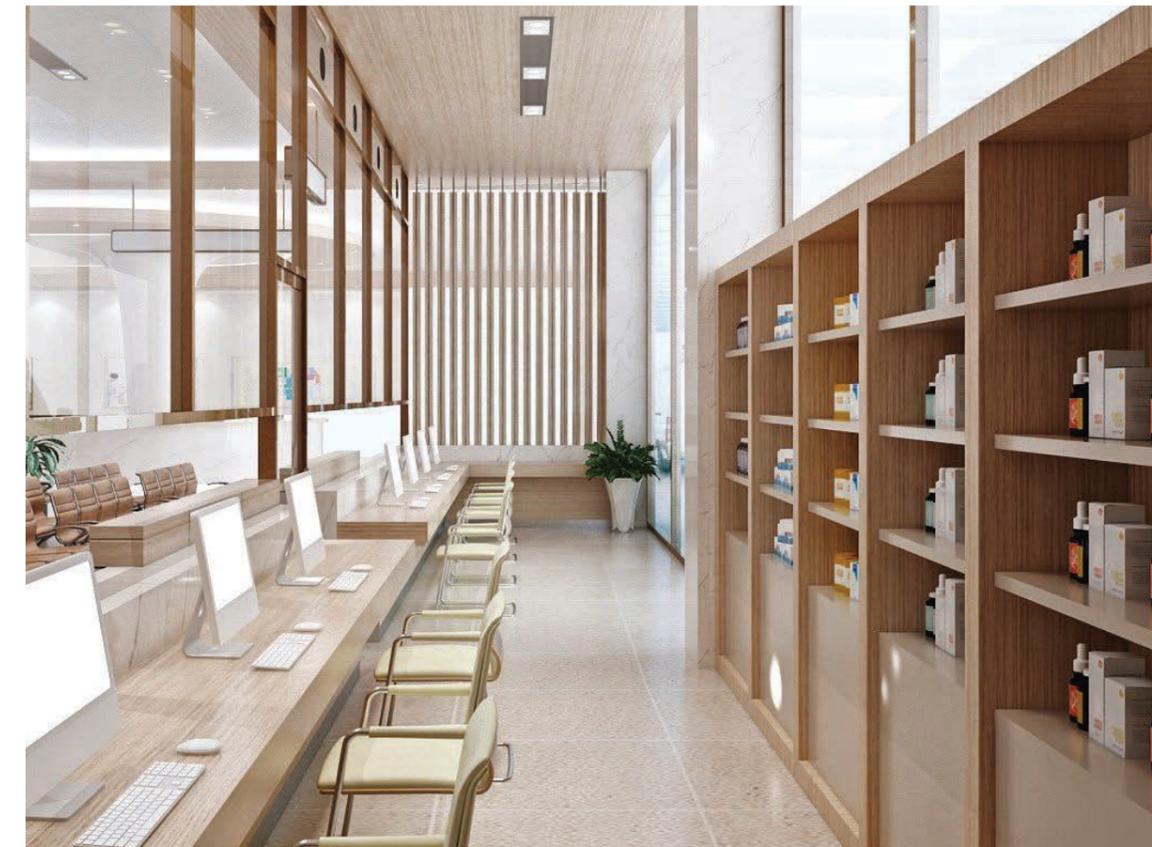

Investor: Can Tho Department of Health

Location: Can Tho

Scale: 500 beds

With its modern design approach, Can Tho General Hospital boasts contemporary architecture, with a functional layout that is both logical and harmonious, blending seamlessly with the surrounding landscape and urban environment. The primary material used is an aluminum mesh system that wraps around the building in an interwoven pattern, creating a cohesive and unified shape.

 **SECOND PRIZE** at the 2009 Architecture Design Competition

# HONG HUNG GENERAL HOSPITAL

Investor: Hung Duy Medical Joint Stock Company

Location: Tay Ninh

Scale: 300 beds

Total floor area: 43.115 m<sup>2</sup>

Designed: 2018

Finished: 2020

Hong Hung General Hospital, under the investment of Hung Duy Medical Joint Stock Company, is a 300-bed facility located in Tay Ninh. The project is designed to ensure aesthetic appeal with modern architecture, while maintaining harmony with the surrounding area. It is equipped with state-of-the-art medical equipment and high-tech facilities, with well-ventilated internal circulation to support efficient healthcare services. The pathways are carefully planned, and clear signage is provided to guide patients.

# CAN THO CHILDREN'S HOSPITAL

Investor: Can Tho Department of Health

Location: Can Tho

Scale: 500 beds

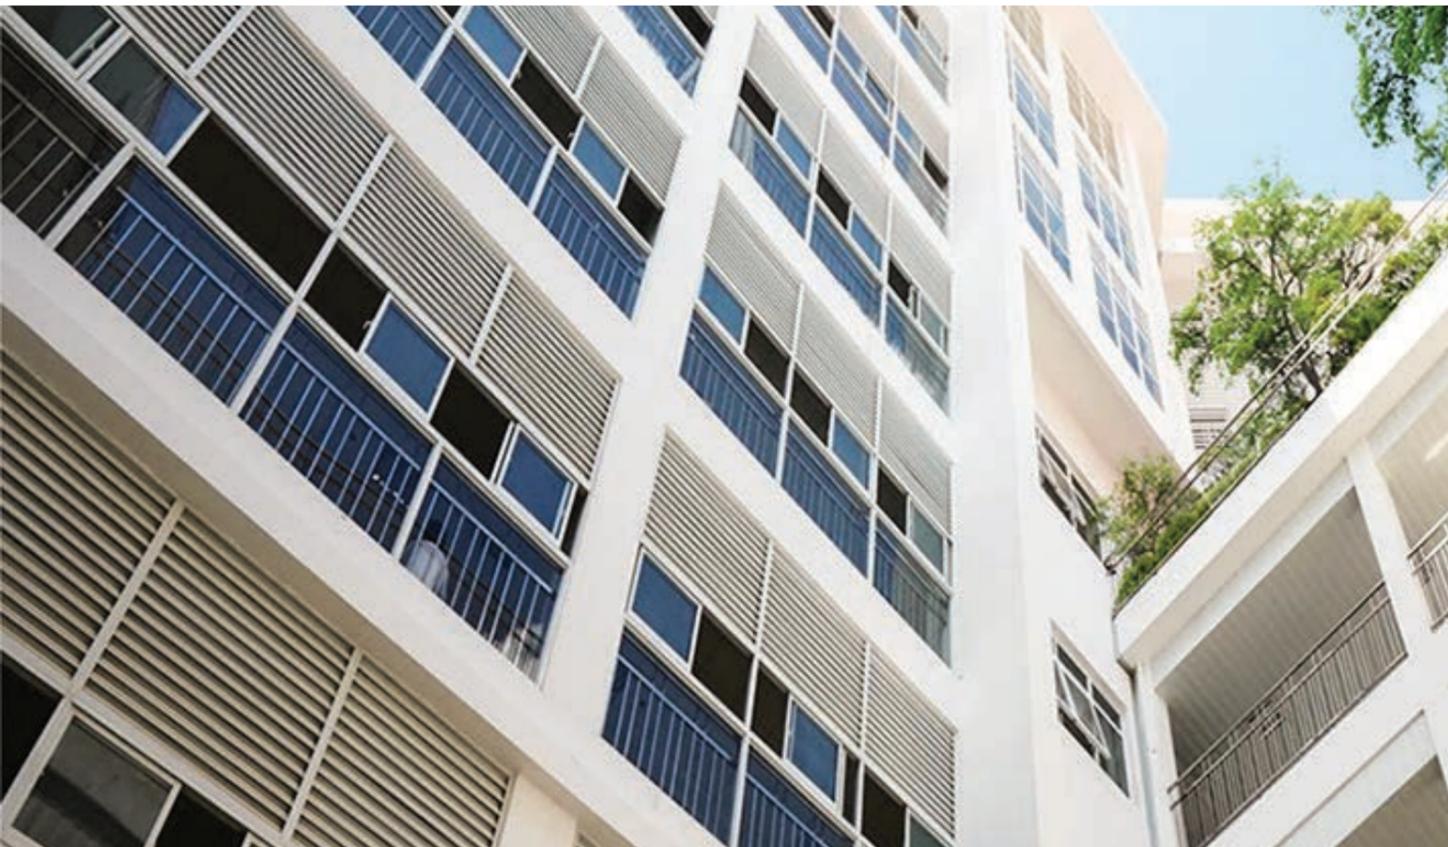

Total floor area: 43.789 m<sup>2</sup>

Designed: 2010

Finished: 2016

Can Tho Children's Hospital was established with the overarching goal of enhancing the diagnostic and treatment capabilities for children in Can Tho city and the Mekong Delta provinces, especially for the underprivileged. The aim is to improve access to high-quality diagnostic and treatment services for children, based on a newly built hospital equipped with the best medical facilities, dedicated to the well-being of these future leaders of society.

 **SILVER PRIZE** at the 2017 National Architecture Awards

# LAM DONG II GENERAL HOSPITAL

Investor: Lam Dong II General Hospital

Location: Bao Loc - Lam Dong

Scale: 500 beds

Total floor area: 52.200 m<sup>2</sup>

Designed: 2010

Finished: 2021

Lam Dong II General Hospital draws inspiration from the traditional Đing-Năm musical instrument and stone gongs, with a design that reflects the unique identity of the Central Highlands.

The hospital, with a capacity of 500 beds, is located on a vast 10-hectare tea hill in Bao Loc city.

Unlike the traditional design of “long corridors” in hospitals, the buildings are separated by departments and functions, with clear connections for easy navigation.

The hospital space utilizes natural light and creates a visual connection that harmonizes with the surrounding nature.

After competing against many entries, the project “Night Song of the Drum” by Master Architect Pham Thanh Truyen and the team at Cat Moc Healthcare Design, which optimally integrates the terrain and landscape, won the First Prize in the architectural design competition for hospital projects.

# PHUC AN KHANG GENERAL HOSPITAL

Investor: Thai Binh Construction and Hotel Business Limited Liability Company

Location: District 2, Ho Chi Minh City

Scale: 500 beds

Total floor area: 70.000 m<sup>2</sup>

Designed: 2013

Finished: 2015

Phuc An Khang General Hospital is a hospital converted from an apartment building, with a scale of 9 floors, located in Ho Chi Minh City. The design ensures aesthetic appeal with modern architecture, while maintaining harmony with the surrounding area. It is equipped with state-of-the-art, high-tech medical equipment, and features well-ventilated internal circulation to support the efficient operation of the facility.

# CAN THO ONCOLOGICAL HOSPITAL

Investor: Can Tho Department of Health

Location: Can Tho

Scale: 500 beds

Total floor area: 44.575 m<sup>2</sup>

Designed: 2006

Can Tho Oncology Hospital, under the investment of Can Tho Department of Health, with a capacity of 500 beds, is located in Ninh Kieu, Can Tho.

The design ensures aesthetic appeal with modern architecture while maintaining harmony with the surrounding area. The hospital is equipped with new, advanced, high-tech medical equipment and features well-ventilated internal circulation to support effective medical operations. The pathways are designed to be rational and accessible for patients.

# BUON MA THUOT UNIVERSITY MEDICAL CENTER

Investor: Buon Ma Thuot Medical And Pharm Aceutical University  
Hospital Joint Stock Company

Location: Buon Ma Thuot

Scale: 200 beds

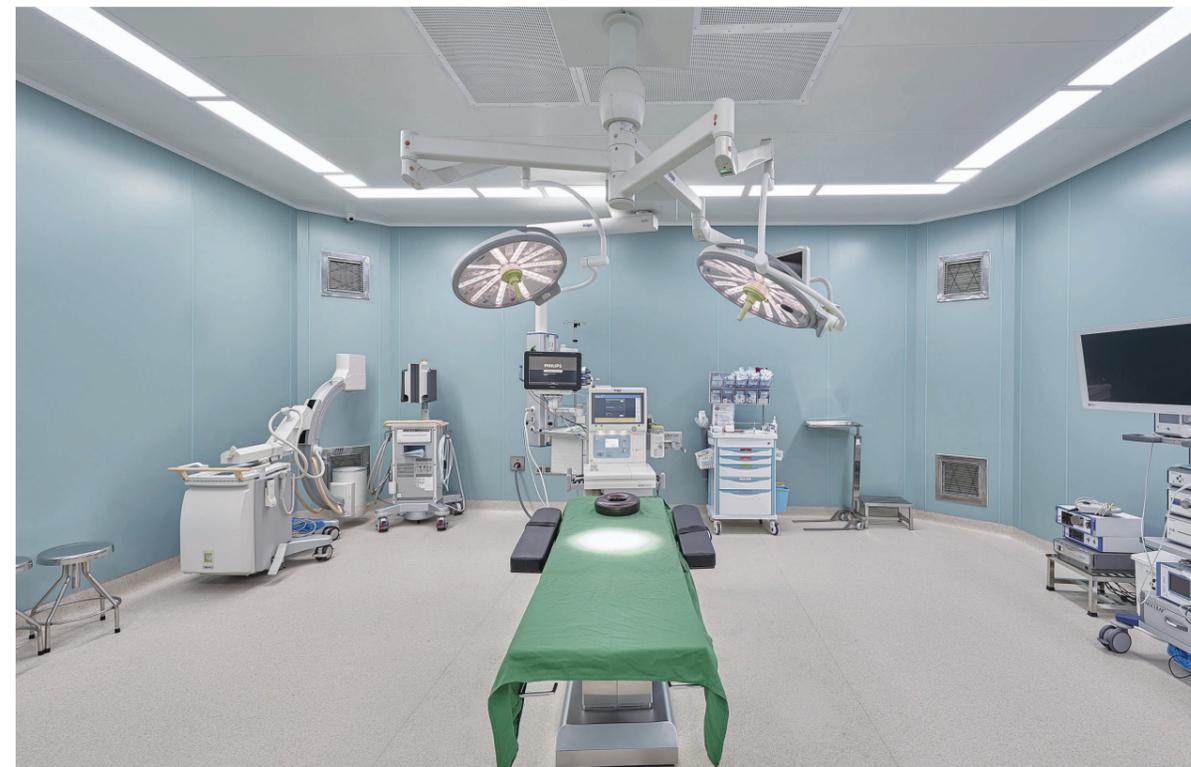

Total floor area: 43.115 m<sup>2</sup>

Designed: 2019

Finished: 2021

The hospital follows a school-hospital model with an initial capacity of 200 beds. It features modern architectural design, with a well-organized layout of functional blocks that harmonize with the surrounding urban landscape. The building's facade, highlighted by a cast-in-place concrete louver system, serves as a focal point in the massing treatment, combining architectural solutions that not only enhance the aesthetics but also facilitate natural ventilation and minimize the adverse effects of sunlight on the building.

 **2023 ASIA ARCHITECT DESIGN AWARD**

# HOP LUC GENERAL HOSPITAL

Investor: Hop Luc Joint Stock Corporation

Location: Thanh Hoa

Scale: 250 beds

Total floor area: 29.865 m<sup>2</sup>

Designed: 2017

Finished: 2019

Hop Luc General Hospital, invested by Hop Luc Joint Stock Corporation, has a capacity of 250 beds. The hospital is built with the aim of reducing overcrowding in city hospitals, enhancing medical examination and treatment services, and ensuring that all residents in the province have access to high-quality healthcare services.

# CAN THO HEART HOSPITAL

Investor: Can Tho Department of Health

Location: Can Tho

Scale: 300 beds

Total floor area: 33.780 m<sup>2</sup>

Designed: 2014

Finished: 2019

With a modern design approach, Can Tho Cardiovascular Hospital features a contemporary architectural form, with a functional layout that harmonizes with both the building's surroundings and the urban landscape.

The primary material used is an aluminum louver system that wraps the building, featuring a parametric design inspired by the shape of a heartbeat. This design creates a dynamic façade, which gives the building a sense of movement when approached.

# SAIGON - LAK HIGH QUALITY GENERAL HOSPITAL

Investor: Saigon High-quality Medical

Service Jointstock Company

Location: Dak Lak

Scale: 6 floors - 200 beds

Total floor area: 22.500 m<sup>2</sup>

Designed: 2024

Saigon-Lak High-Quality General Hospital, invested by Saigon High-Quality Medical Services Company, with a scale of 200 beds, is located in Dak Lak. The hospital features a 6-story main building with a curved architecture that serves as a focal point, complemented by modern sun-shading solutions, harmonizing with the natural surroundings.

The scientific division of departments and rooms ensures that professional processes are carried out smoothly and efficiently.

The facility stands out with its therapeutic resort-style healing spaces, featuring bungalow units. This design not only optimizes patient care spaces but also offers a unique rest and recovery experience, seamlessly blending medical functions with leisure spaces.

Each area meets safety standards, ensuring balanced temperature, lighting, and ventilation, along with the investment in modern, high-tech equipment to support treatment and recovery for both staff and patients.

# TAM BINH AN GENERAL HOSPITAL

Investor: Hung Thinh Health Development Investment Joint Stock Company

Location: Ninh Binh

Scale: 6 floors - 200 beds

Total floor area: 27.500 m<sup>2</sup>

Designed: 2024

Tam Binh An General Hospital, invested by Hung Thinh Health Development Investment Joint Stock Company, with a scale of 5 stories and 200 beds, is the first private general hospital in Hoa Lu, Ninh Binh.

The hospital features modern architecture with a simple block layout. The facade incorporates sun-shading solutions combined with greenery, creating an aesthetic, friendly medical space that harmonizes with the urban landscape and minimizes adverse environmental impacts.

Prioritizing medical services, the design divides the lobby into distinct departments and clusters of examination rooms, ensuring a logical layout of functional areas for convenient internal circulation and spaciousness. The facility is equipped with modern, high-tech medical equipment to ensure that the hospital meets quality standards.

# NGOC DUNG COSMETIC HOSPITAL

Investor: Ngoc Dung Aesthetic Company Limited

Location: Da Nang

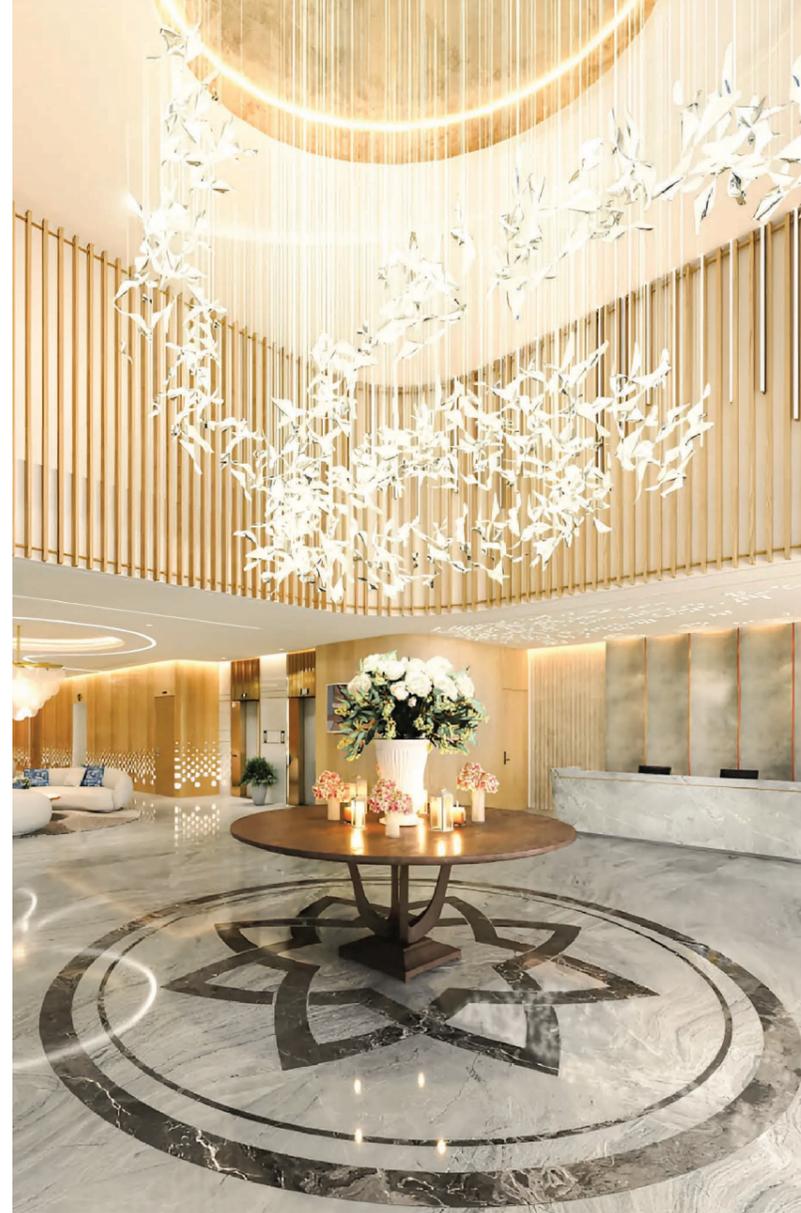

Scale: 21 floors

Total floor area: 7.400 m2

Designed: 2023

Ngoc Dung Cosmetic Hospital, with a scale of 21 stories, is characterized by modern block design, aligning with the overall urban planning and landscape of the area. Its strategic location near the Dragon Bridge on the Han River not only highlights the building within the urban space but also takes advantage of its connection to the natural landscape.

The facility serves not only as a modern medical center but also provides a space for aesthetic services that meets international standards, optimizing functionality and modern equipment to serve clients in the best possible way.

# FAMILY DOCTOR HOSPITAL

---

Investor: Tran Hung

Location: Da Nang

Scale: 100 beds

Total floor area: 10.800 m<sup>2</sup>

Designed: 2010

Finished: 2014

Danang Family Doctor Hospital, with a capacity of 100 beds, is located in Da Nang. The hospital features a modern architectural style, incorporating sun-shading solutions through the use of louver panels, along with hollow block structures arranged in specific proportions and modules. The addition of greenery creates an aesthetically pleasing and welcoming environment.

The hospital prioritizes medical services, with the architectural layout of functional areas designed to facilitate internal circulation and ensure spaciousness. The facility is equipped with state-of-the-art, high-tech equipment, ensuring that the hospital meets high standards.

# DAT VIET GENERAL HOSPITAL

Investor: Dat Viet International General Hospital Limited Liability Company

Location: Da Nang

Scale: 100 beds

Total floor area: 13.000 m<sup>2</sup>

Designed: 2011

Dat Viet International General Hospital, with a capacity of 100 beds, is located in Buon Ma Thuot. The design features simple block structures with a modern style, using only basic blocks arranged harmoniously to create a unified and refined overall appearance, contributing to the beauty of the urban landscape.

The hospital ensures that pathways are logically arranged with clear directional signage and maintains efficient internal circulation to effectively support medical examination and treatment services.

# HONG LAM GENERAL HOSPITAL

Investor: Central Travel Trading Joint Stock Company

Location: Ha Tinh

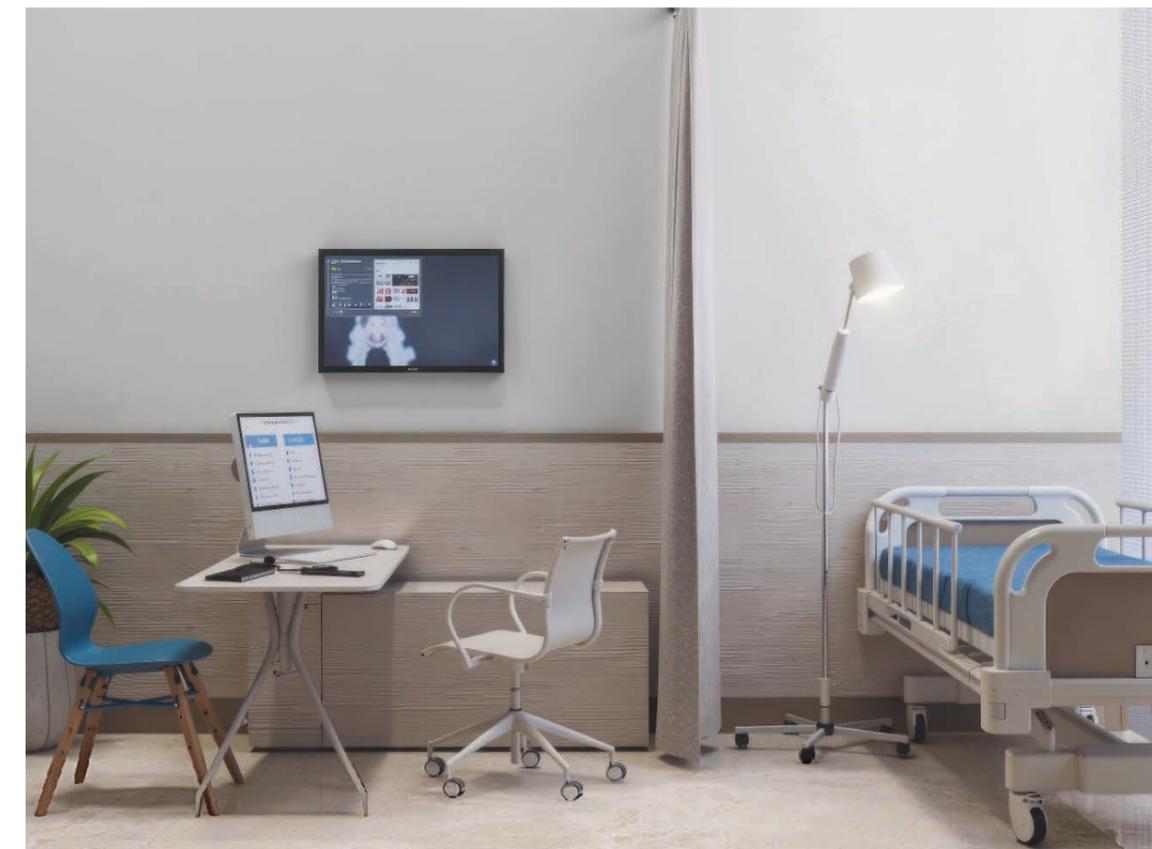

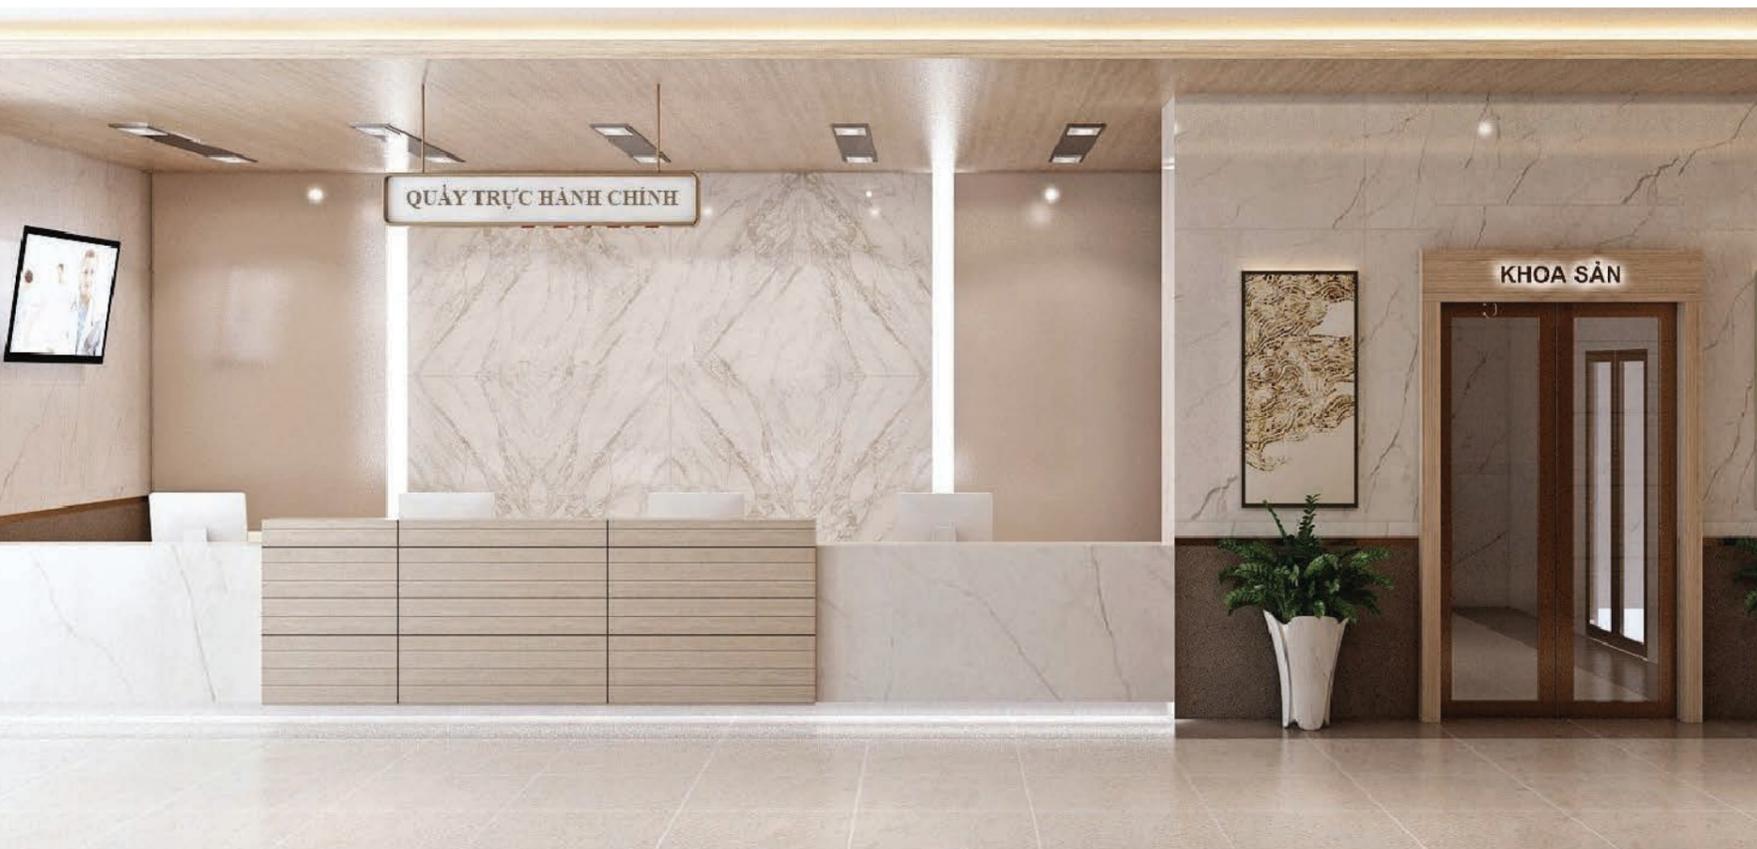

Scale: 100 beds

Total floor area: 8.742 m<sup>2</sup>

Designed: 2018

Hong Lam International General Hospital features a modern architectural design with a well-organized functional layout that harmonizes with the surrounding structure and urban landscape.

The primary material used is a system of aluminum louver panels surrounding the building, arranged according to specific ratios and modules.

# HUYNH TRUNG DUNG GENERAL HOSPITAL

Investor: Le Thi Kim Hong

Location: An Giang

Scale: 5 floors

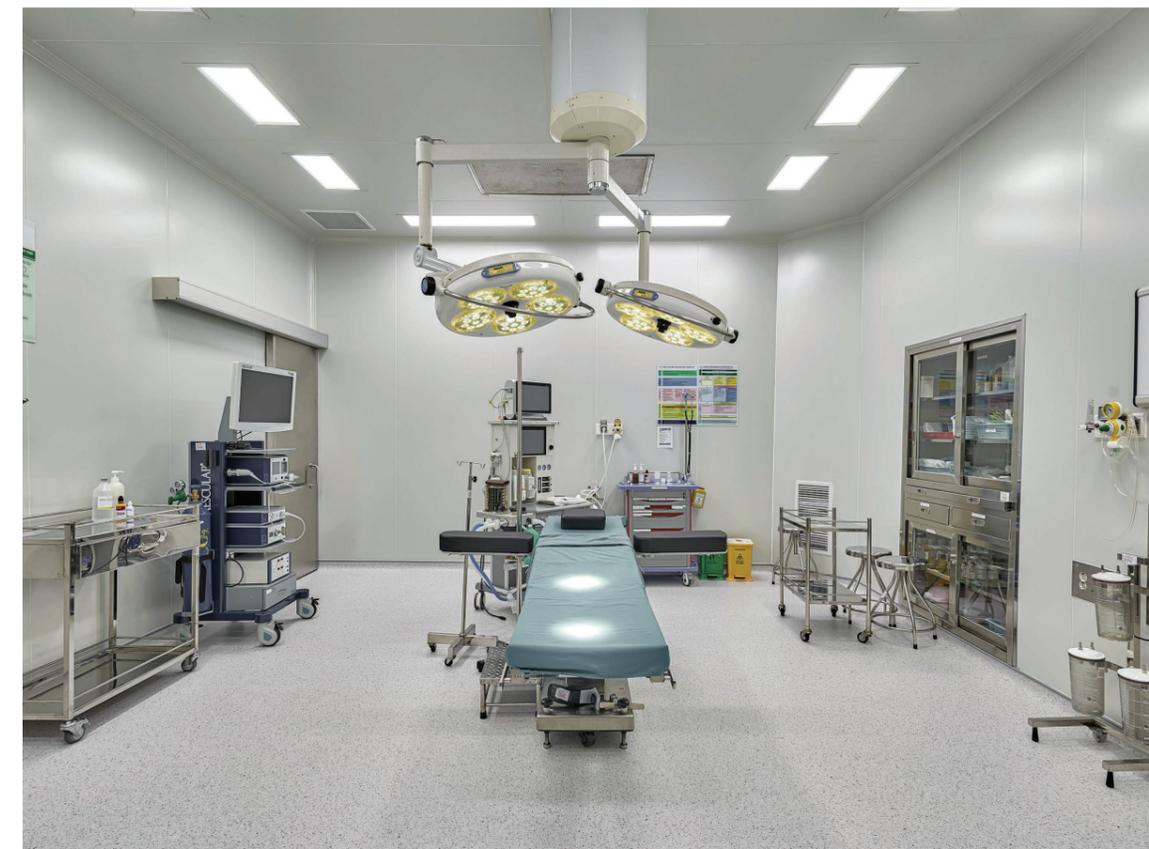

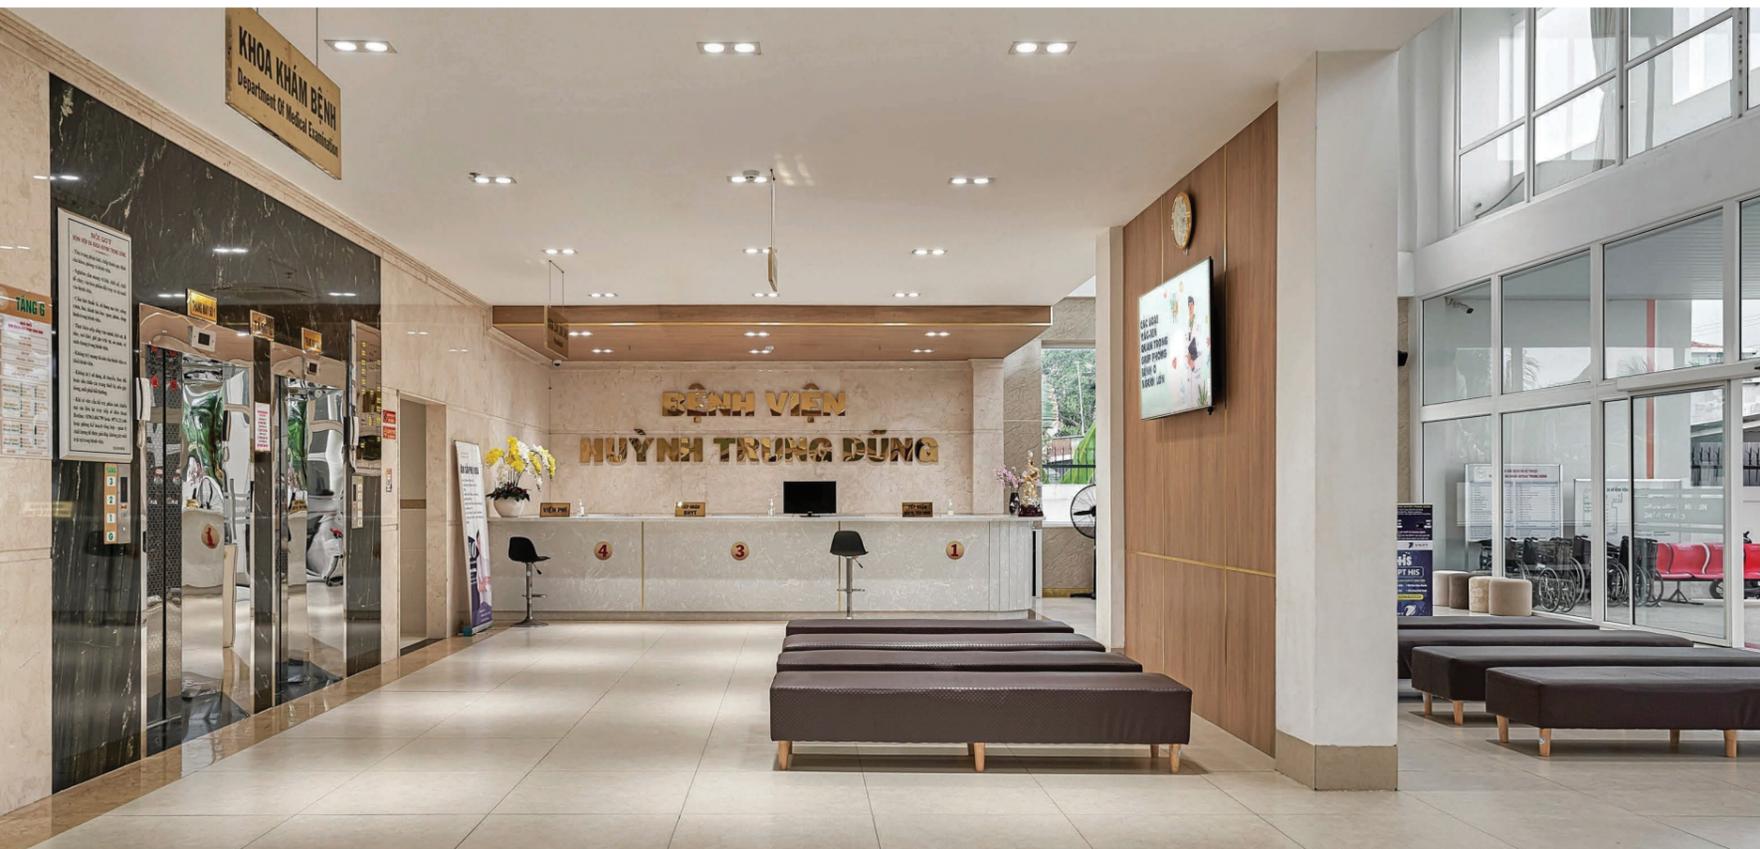

Total floor area: 4.375 m<sup>2</sup>

Designed: 2020

Finished: 2021

Huynh Trung Dung General Hospital, designed and constructed by Cat Moc Healthcare Design, showcases a modern architectural style. The hospital features a well-organized layout of functional blocks, blending seamlessly with both the structure's landscape and the surrounding urban area.

The primary materials used include walls and glass, enveloped with an Indian laurel vine system, creating a harmonious facade.

# THE GIOI DEP COSMETIC HOSPITAL

Investor: The Gioi Dep Cosmetic Hospital

Location: District 6, Ho Chi Minh City

Designed: 2023

Finished: 2024

The Gioi Dep Beauty Clinic is one of the aesthetic clinics designed by Cat Moc Healthcare Design.

It meets high standards, from functional zoning processes to modern equipment, creating a premium beauty space for clients.

# THAO DIEN PLASTIC SURGERY HOSPITAL

Investor: Thao Dien International Cosmetic Surgery Specialty Hospital Joint Stock Company

Location: Ho Chi Minh City

Scale: 9 floors

Total floor area: 2.600 m<sup>2</sup>

Designed: 2015

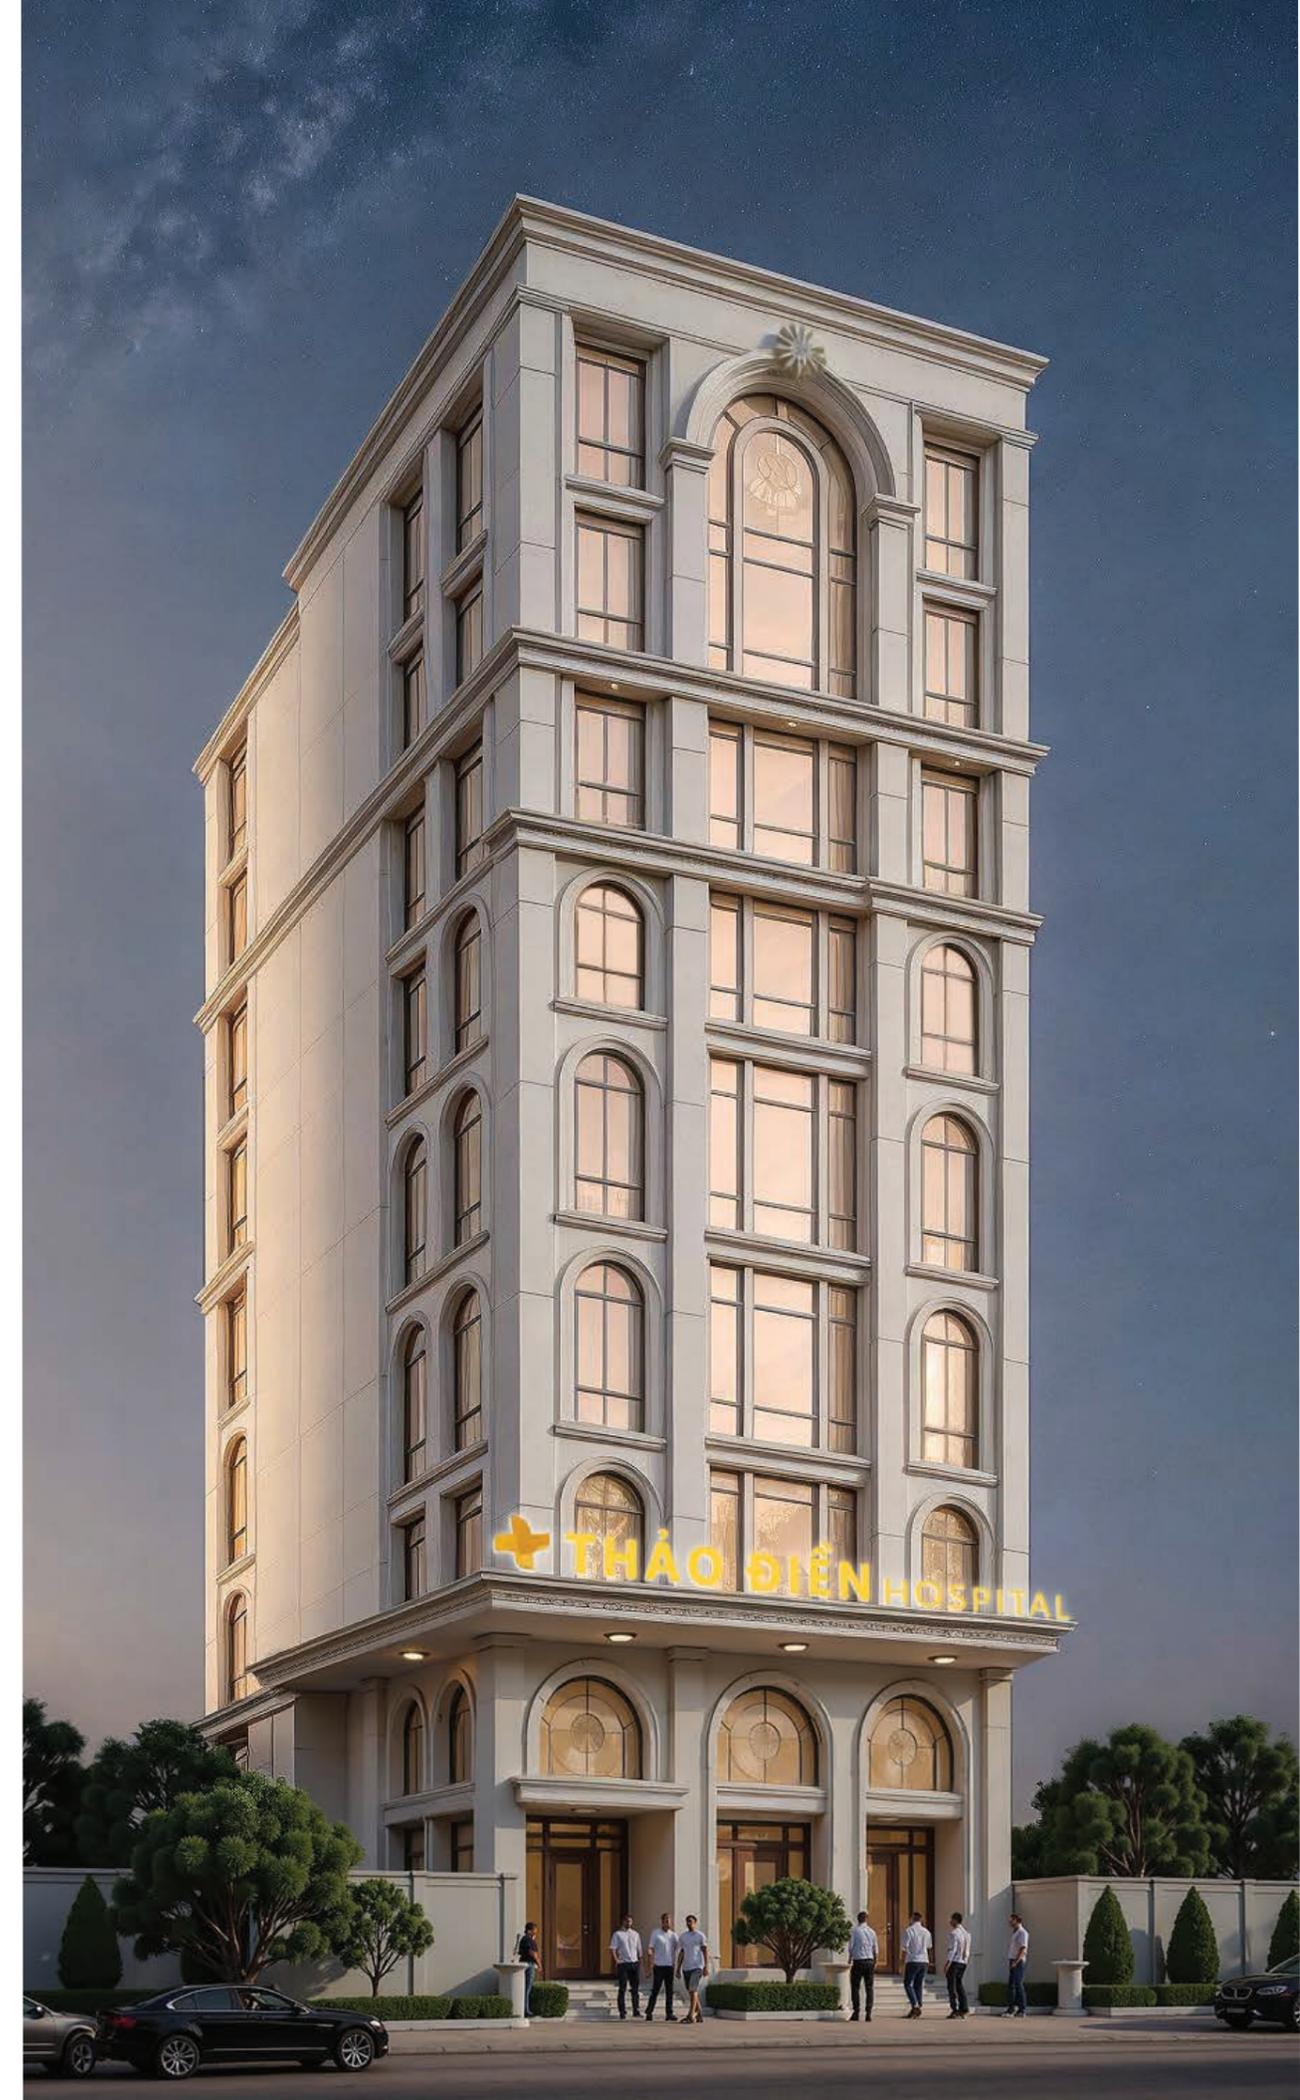

Finished: 2016

Thao Dien Plastic Surgery Hospital, invested in by Thao Dien International Cosmetic Surgery Specialty Hospital Joint Stock Company, is a 9-story facility located in Ho Chi Minh City. The hospital features modern architecture that blends harmoniously with its surroundings.

Equipped with state-of-the-art equipment and advanced techniques, the hospital provides an open internal layout with well-organized pathways and detailed directional guides.

Separate transport systems for different operational groups within the hospital ensure smooth, non-overlapping traffic flows.

# 400 MATERNITY HOSPITAL

Investor: Le Ba Thanh

Location: Thanh Hoa

Scale: 12 floors

Total floor area: 5.168 m<sup>2</sup>

Finished: 2020

400 Maternity Hospital with 12 floors located in Thanh Hoa, is designed with an aesthetic, modern architectural style that blends seamlessly with the surrounding area. The hospital is equipped with new, advanced technology and provides an open, well-ventilated layout to facilitate efficient patient care. Pathways are logically organized, with clear signage and designated routes for distinct movement flows.

Due to limited construction space, the hospital features a functional zoning layout in a compact form, utilizing aluminum louvers and glass walls with interwoven geometric shapes. The interplay of solid and open spaces, combined with greenery, creates a harmonious form with defined proportions and modules, ensuring a sophisticated, aesthetically pleasing structure.

# VAN GIA AN GENERAL HOSPITAL

Investor: Kon Tum Medical Investment  
& Development Joint - Stock Company

Location: Kon Tum

Scale: 100 beds

Total floor area: 12.615 m<sup>2</sup>

Designed: 2019

Finished: 2021

Van Gia An International General Hospital features a modern architectural style with a well-organized layout of functional blocks, harmonizing with both the building's design and the surrounding urban landscape.

The main material used is an aluminum mesh system that interweaves around the structure, creating a unified and aesthetically pleasing form. This design not only enhances visual appeal but also minimizes adverse impacts, ensuring a sustainable building.

# LY SON MILITARY HOSPITAL

Investor: Quang Ngai Consultancy

& Construction Company Limited

Location: Quang Ngai

Scale: 100 beds

Total floor area: 12.500 m<sup>2</sup>

Designed: 2020

Finished: 2024

Ly Son Military Hospital with a capacity of 100 beds, located in Quảng Ngãi, features a modern architectural style. The primary materials used are walls and glass, combined with green spaces that harmonize the building's facade with both the structure and the surrounding urban landscape.

The hospital is designed for convenient internal circulation, accommodating the installation of modern technical equipment, ensuring that residents across the province have access to high-quality healthcare services.

04

## NOTABLE CLINIC PROJECTS

*HAVE DESIGNED*

# AN PHUC GENERAL CLINIC

Investor: An Phúc General Clinic

Location: District 10, Ho Chi Minh City

Scale: 7 floors

Designed: 2015

Finished: 2016

An Phuc General Clinic is one of the leading multidisciplinary treatment centers in Ho Chi Minh City, dedicated to the comprehensive development of both its facilities and its team of medical professionals to provide the best possible services to patients.

# UNIVERSITY MEDICAL CLINIC

Investor: Viet Medical Trading And Service Corporation

# CHD CULTURE

CHÚC MỪNG SINH NHẬT CÁT MỘC GROUP LẦN THỨ 18

In addition to striving to provide the best quality products for the community, Cat Moc Healthcare Design also aims to contribute by bringing many other values to society.

**This is why the charity fund "From Heart to Heart" was established by Cat Moc Group.**

## Founded in 2004

After more than 20 years of formation and development, Cat Moc Healthcare Design (CHD) has steadily become one of the leading companies in the field of hospital, clinic, and healthcare center design across the country.

With a team of highly skilled architects, rich experience, and passionate dedication, CHD continually strives to innovate and deliver valuable design solutions to its clients through every project.

We always listen to our clients' needs and combine them with our expertise to create spaces that offer lasting value over time, ensuring quality, safety, and optimal functionality of the project.

People are our top priority. At CHD, we focus on building and training a professional, united, dynamic, and creative team, committed to delivering value that benefits the community.

Every year, Cat Moc organizes trips to visit and deliver gifts to orphanages and charity homes.

The company also supports funds for distributing Tet gifts to poor and near-poor families, as well as orphaned children. Additionally, Cat Moc holds donation drives for used clothes and books.

On October 18, 2021, Cát MỘC Healthcare Design donated an ambulance to the people of Pho Phong Commune, Duc Pho Town, Quang Ngai Province.

In this area, where the distance to medical centers and hospitals is far, and transportation conditions are challenging, the ambulance was fully equipped with essential medical equipment such as an oxygen tank, medicine cabinet, and stretcher to provide emergency care for patients.

Since its donation, the ambulance has contributed to saving hundreds of lives by transporting patients to the hospital promptly, regardless of the time of day or night, helping shorten the distance to healthcare services and providing better healthcare for the local community.

Most recently, Cat Moc Healthcare Design (CMG) visited the people of Ba Ngạc Commune, Ba To District. CMG, along with philanthropists from across the country, joined hands to bring support and spread love to the community.

In the future, Cat Moc will organize more trips to continue its mission of supporting many underprivileged lives and those facing difficult circumstances.

# THANK YOU!

# AN PHU GENERAL HOSPITAL

Investor: An Phu General Hospital Joint Stock Company

Location: Binh Duong

Scale: 3 floors

Total floor area: 4.015 m<sup>2</sup>

An Phu General Hospital is located in Binh Duong and features a simple yet modern architectural design. Its exterior incorporates shading elements that harmonize with the surrounding landscape, ensuring both aesthetics and sustainability. The hospital's three-floor structure is thoughtfully planned with functional zones arranged in a logical and scientific manner, prioritizing efficient patient flow for medical examinations and treatments.

The interior spaces are bright and airy, with friendly color schemes that promote comfort and well-being. Combined with the integration of advanced technology and state-of-the-art equipment, the hospital provides a comprehensive environment for exceptional patient care.
